INTRODUCTION

"Chic Choice" is a exceptional e-commerce platform, where customers can shop for fashionable items while also having the opportunity to book a **fashion designer** for customer specific needs. And this platform also provides business deals to the fashion designers. Customer can enjoy the best of both worlds - shopping convenience and personalized fashion expertise - all in one place.

PURPOSE

The purpose of our application Chic Choice is to enable users to have one stop solution for their shopping problems, where they can purchase clothes as well as get their dress designed from the best of the designers.

SCOPE

Customers will be able to create accounts, login securely, manage their profiles and place the order. Designers will also have separate accounts to add services, photos and also manage orders. Administrator can manage whole activities performed on the website.

DEFINITION, ACRONYMS AND ABBREVIATIONS

SL.NO	Terms/Acronyms	Description
1	Admin	Super user, add the designer and manages the order and system
2	Designer	Who will login to provide service
3	Customer	Who will register and order product and book designer

Add to Cart

Customer can add products to Cart

View Order and Booked designers

Customer can view the order and booked designer status

Order product

Customer can order the product

Order Designer

Customer can order the designer

FUTURE SCOPE

- We can create android application for this project.

- **Augmented reality**: With the help of augmented reality, customers can try on clothes virtually and get a better sense of how they will look before making a purchase. This technology could also be used to show customers how clothes will fit on different body types.

- **Social media integration**: Social media has become an important part of the fashion industry, and e-commerce websites can take advantage of this by integrating social media

platforms into their websites. This could include allowing customers to share their purchases on social media, or using social media influencers to promote products.

- **Drone Delivery:** Another popular online shopping trends 2023 is the use of drones for delivery. This is a popular trend that can be popular while businesses try to make contactless deliveries.

CONCLUSION

"Chic Choice," is unique e-commerce platform focused on fashion. It not only allows customers to shop for trendy items but also introduces a novel concept of booking fashion designers for personalized needs. This two-fold approach benefits both customers and designers, offering convenient shopping and collaborative design opportunities. Chic Choice aims to bring fashion enthusiasts and designers together in a user-friendly and innovative way.
